ENCLOSE

Hide your home's unsightly outdoor utility units with our range of ENCLOSE premium aluminium covers to stylishly screen heat pumps, water pumps, pool pumps, gas bottles and wheelie bins.

At Enclose we are passionate about transforming your outdoor space by hiding your home's unsightly external utilities with architecturally designed premium aluminium covers. Heat pumps, gas bottles, pool pumps, water pumps and council wheelie bins typically sit right in your eyesight and can be the most unattractive feature of your beautiful home.

We have designed a range of covers that are not only aesthetically pleasing but also functional, top quality and easy to install. Best of all, they are made right here in New Zealand, perfect for our changeable climate.

As specialists in engineering design and fabrication, our team only use top grade aluminium and stainless steel hardware. Covers are finished with high-quality powder coating by Dulux accredited applicators to keep your assets protected while seamlessly blending into the architecture of your property.

In this catalogue you will find our range of Enclose premium aluminium outdoor covers. If our standard sizes do not meet your requirements, we can quote, design and build you a custom cover to fit your specific needs.

PREMIUM ALUMINIUM HEAT PUMP COVERS

SMALL

760mmH x 395mmD x 1010mmW
(Internal dimensions of cover)

LARGE:

1025mmH x 435mmD x 1010mmW
(Internal dimensions of cover)

Enclose Heat Pump Covers have been engineered to ensure the air flow of the louvre design, does not impact the functionality of your air conditioning unit. The aero blade louvre design works to ensure the heat pump performs as it should.

We choose to use high grade New Zealand made aluminium for its rigid strength yet light weight properties to ensure no sagging or rusting.

Enclose covers are powder coated by Dulux accredited appliers to ensure a premium finish and one that will stand the test of time.

Mounting your Enclose Heat Pump Cover is a simple process; simply remove cover from the packaging, unfold the sides and place around your unit at the correct distance from the wall.

Our convenient adjustable feet make mounting on uneven ground easy. If you cannot fix it to the ground, we offer optional wall brackets that fix from the back of the cover to the wall.

We recommend installation of your Enclose Heat Pump Cover on a level concrete or wooden platform for optimal use and fastening.

TESTED TO MEET AS/NZS STANDARD

NZ's only independently tested heat pump covers to meet AS/NZS standard for airflow, as tested by world leading international ISO certificated scientists.

PREMIUM ALUMINIUM GAS BOTTLE COVERS

1445mmH x 440mmD x 980mmW
(Internal dimensions of cover)

Fits two 45kg gas bottles

Enclose Gas Bottle Covers discretely hide those unsightly gas bottles on the exterior of your home and are designed to accommodate two 45kg gas bottles.

Their elegant louvered design seamlessly blends with your outdoor setting in a Dulux powder coat colour of your choice.

Featuring hinged doors for easy access and a lockable latch to ensure gas bottles are safely stowed away.

The louvered design allows for adequate ventilation to adhere to all gas storage requirements.

As with all our Enclose products, they are made in New Zealand and are rigorously tested for quality and performance.

We deliver our gas bottle covers nationwide, and they are conveniently flat packed, ready for DIY installation.

Mounting options include convenient adjustable feet which can be fixed to a base plate or optional wall brackets to help secure your cover in place.

We recommend installation on a level concrete or wooden platform for optimal use and mounting.

STORAGE REQUIREMENTS

NZ LPG storage requirements advise that gas bottles are best stored outdoors, in an upright position, prevented from falling and protected from impact. They should be stored in a well-ventilated area away from any flame, heat or other ignition source.

PREMIUM ALUMINIUM WHEELIE BIN COVERS

2-Bin Cover
1128mmH x 806mmD x 1300mmW

3-Bin Cover
1128mmH x 806mmD x 1900mmW
(External dimensions of cover)

Enclose premium range of aluminium wheelie bin covers are designed to enclose two or three 240L bins, or smaller.

Stainless steel gas struts keep the lids propped open for easy disposal of rubbish and our cleverly designed lid lifting system means there is no need to touch your wheelie bin lids.

Stylish louvered and latched doors create easy access to your bins on rubbish day.

The louvre design provides for adequate ventilation and low maintenance.

As standard, our bin covers come with no rear panel or shelves, but these are available on request.

Mounting options include our adjustable feet for fixing to uneven ground or optional wall brackets to secure your cover to a back wall.

Where possible we recommend installation on a level concrete or wooden platform for optimal use and mounting.

COLOUR GUIDE

Enclose offer the full range of standard Dulux powder coating colours. This allows you to personally select the ideal colour for your home. Our most popular colours are available at checkout, but if you don't see your colour, send us a note and we will endeavour to find a match.

PREMIUM ALUMINIUM WATER PUMP COVERS

595mmH x 350mmD x 700mmW
(Internal dimensions of cover)

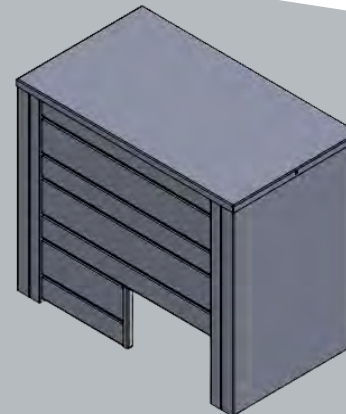

We have designed our Enclose Water Pump Covers as an attractive alternative to the standard plastic covers.

If you have created a beautiful outdoor oasis, then like us you want your water pump to be seamlessly enclosed away and out of sight. Our designer Enclose Water Pump Covers feature stylish aluminium slat to achieve just that.

Our water pump covers come either standard or with an optional space in the slat side to suit existing pipework. Our clever design caters to most water pump pipe requirements.

No mounting is required, simply place your Enclose cover over your existing water pump.

If you have a larger water pump on your property, we will happily custom design and manufacture a cover to suit your needs.

Enclose Water Pump Covers can be made with optional space to suit your existing pipework.

PREMIUM ALUMINIUM POOL PUMP COVERS

1070mmH x 735mmD x 1230mmW
(Internal dimensions of cover)

Enclose premium range of aluminium pool pump covers are designed to go beautifully with your outdoor setting and compliment your existing features. They are the perfect finishing touch for your pool oasis.

Our team have designed the ideal combination of aesthetics and functionality for your pool pump enclosure.

Enclose Pool Pump Covers feature an easy opening lid with stainless steel gas struts, along with dual aluminium louvre hinged doors for easy access to your pool pump.

Proudly made in New Zealand, Enclose Pool Pump Covers include top-grade stainless steel and nylon hardware, premium aluminium louvre panels expertly welded for strength and finished in a standard Dulux powder coat colour of your choice.

As standard, our pool pump covers come with no rear panel or shelves, but these are available on request.

Mounting options include convenient adjustable feet which can be fixed to a base plate or optional wall brackets to help secure your unit in place.

We recommend installation on a level concrete or wooden platform for optimal use and mounting.

INSTALLATION REGULATIONS

Pool pump covers are best installed in non-climable zones. The location of your pool pump cover must meet your local council pool safety regulations. We recommend you confirm these with your council or pool supplier before installing your new Enclose Pool Pump Cover.
