INTRODUCING THE **ENGEL FIRE**

A PREMIUM WOOD-FIRED COOKING & ENTERTAINING EXPERIENCE

The Engel Fire is more than just a beautiful outdoor fire place. It's also a highly functional grill, rotisserie, slow cooker, smoker, wood-fired BBQ and pizza oven.

Every function of the Engel Fire is easy to access. Switching from one cooking method to another is a simple, seamless process. From lighting the fire, to moving the embers to the front or back, to bringing the grill forward or adding the rotisserie. We like to think we have thought of everything to make your experience effortless.

PRECISION **ENGINEERED**

The Engel Fire has been cleverly handcrafted to provide a premium outdoor fire experience like no other. Precision engineered to the highest standards using stainless steel and brass components. The Engel has been built to stand the test of time.

With each Engel Fire being custom made, you can choose to have your grill customised with your name which is one of those little touches that truly make the Engel Fire all yours.

THE ULTIMATE **EXPERIENCE**

The Engel Master and Inbuilt have been designed to provide an unrivalled cooking experience. Complete with an adjustable grill, moveable fire basket, adjustable flue, lockable stainless steel doors and temperature gauge.

'The Engel is a standout when it comes to quality. It's multi-function use means we can use it all year round; rotisserie chicken in winter, wood fired pizza in summer and fish when they are biting! One of the best parts is that once we're done cooking, we have a roaring fire to sit around, so it's perfect for entertaining.'
