Innovation to build tomorrow

Timber Cladding | Hardwood Decking | Interior Panelling
Thermally Modified Timber | Battens & Screens | Timber Coatings & More

ABOUT JSC

JSC is New Zealand’s trusted partner for premium, sustainable timber solutions, backed by 125 years of experience. We combine innovation, deep expertise, and cutting-edge technology to deliver high-performance materials that meet today’s design demands and tomorrow’s environmental standards.

All JSC products are sustainably and legally sourced through long-standing relationships with trusted global suppliers. As active members of NZITTG and NZTIA, we advocate for responsible forestry and resilient design that supports both the built and natural environment.

With deep technical capabilities across timber cladding, hardwood decking, interior panelling, coatings, and thermally modified timber, our team is the ideal collaborative partner to deliver premium results and the innovation to build tomorrow.

ALASKAN YELLOW CEDAR

VERTICLAD

VERTICAL SHIPLAP WEATHERBOARD CLADDING SYSTEM

Add a touch of modern elegance to your building with JSC Vertical Shiplap Cladding. The clean vertical lines of this cladding provide a sleek, smart, and contemporary appearance. This system provides a smooth, linear path that can bring the impression of height and add a strikingly distinctive look to the building.

BEVELCLAD

BEVEL BACK WEATHERBOARD CLADDING SYSTEM

A classic style across New Zealand’s rural and urban landscapes, JSC Bevel Back weatherboards epitomise stability and durability, and are known for their bold shadow lines and solid aesthetic.

RUSTICLAD

RUSTICATED WEATHERBOARD CLADDING SYSTEM

Experience timeless charm of rusticated weatherboards - a traditional and popular exterior finish that never goes out of style. The distinctive horizontal lines deliver a subtle look, creating visual effect that will enhance any architectural style from heritage homes to modern designs.

BOARD & BATTEN

BOARD & BATTEN WEATHERBOARD CLADDING SYSTEM

JSC Board and Batten cladding creates a layered, geometric finish through the use of wide boards on the base with narrow battens on top. The shadow lines add depth and texture to the façade, providing character and offering an intense contemporary look.

JSC TIMBER COATING SOLUTIONS

PREMIUM FACTORY COATINGS.

Today's modern architectural designs are increasingly calling for timber applications to be both low maintenance and excellent in lifetime performance. This led us to develop a range of coatings and application technology, which achieves this goal and complement our range of timbers beautifully.

Specifically designed for the New Zealand conditions and unique architectural styles, you'll find our ranges' colour palettes reflect the latest trends.

JSC SCUMBLE® WOOD OIL

JSC Scumble® Wood Oil is an advanced water-based timber coating formulated with natural plant-based oils, UV inhibitors, and high-quality pigments. Its higher pigment content provides stronger tint coverage and creates a durable protective layer on the timber surface, supporting extended maintenance intervals. JSC Scumble features carefully curated colours inspired by New Zealand's landscape and building styles, offering a refined finish that balances natural timber character with greater colour coverage.

JSC CODA® WOOD OIL

JSC Coda® Wood Oil is a premium water-based penetrating oil designed to enhance and protect timber while showcasing its natural grain. Its semi-transparent formulation penetrates the timber, allowing the texture and natural variation of the wood to remain clearly visible. JSC Coda® is available in a wide colour range of over 15 colours plus a clear option, offering greater design flexibility while maintaining a natural timber aesthetic.

COMMON BENEFITS OF THE JSC WOOD OIL RANGE:

- | | |
|--|---|
| <ul style="list-style-type: none">• Fast drying with very low VOC• Water-based product• Natural plant-based oil ingredients• Inhibits fungal growth for exterior applications• Strong dirt and water repellence• Easy application process | <ul style="list-style-type: none">• Helps reduce harmful UV effects including cupping, splits, and dimensional movement• External Coatings will weather naturally without flaking, peeling, blistering, or cracking• JSC Scumble & JSC Coda Wood Oils are suitable for both exterior and interior applications. |
|--|---|

JSC CODA® LUXURY INTERIOR WAX

Also known as "Lux Wax", is an interior coating that has a durable silk-gloss finish. With UV protection, stain resistance, and a fast-drying, low-odour formula, this coating is designed to protect the timber while enhancing the natural beauty of interior timber surfaces.

Note: JSC Coda Luxury Interior Wax coating is suitable for interior applications only.

JSC TMT®

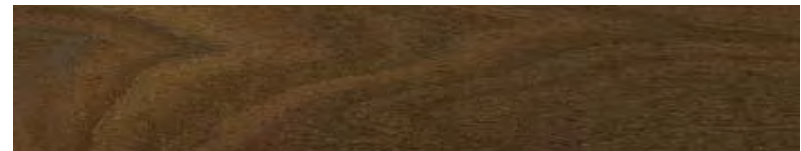

THERMALLY MODIFIED TIMBER.

Increasing environmental awareness and demand for sustainable, natural and chemical-free building products initiated JSC's research into thermal timber treatment methods, recognising that Thermally Modified Timber opens up a truly sustainable resource.

JSC TMT PRODUCT RANGE

TMT TAIGA

TMT TAXON

TMT AMBA

KEY PROPERTIES OF THE JSC TMT® PRODUCT RANGE

- Excellent dimensional stability through reduced moisture absorption and modified cell structure. Able to accept darker coatings with significant reduction in dimensional movement.
- The TMT process dramatically reduces the occurrence of fungal decay by removing the food source and reducing the equilibrium moisture content of the timber.
- Proven to perform and look beautiful for longer in the most challenging conditions.
- Premium quality that is responsibly sourced. There is no presence or release of added toxic substances during the building life.
- Truly natural product with certified quality; all JSC TMT® products are sourced from reliable and world-renowned suppliers that are leaders in the timber thermal modification process.
- Whether a feature or clearer grade, all JSC TMT® options come in beautiful rich brown tones and take oil and water-based coatings well, including dark colours.

INTERIOR LINING

INTERIOR TIMBER PANELLING & SARKING.

The perfect way to seamlessly connect your interior to the natural environment, timber panelling can fully transform any residential or commercial space. Used as traditional wall or ceiling coverage, or as a feature wall, timber interior panelling adds warmth, character and distinct natural characteristics to any project.

Available in a wide range of timber species and profiles, sizes and finishes, JSC's interior panelling range provides enormous scope for design creativity and innovation.

Our expert team are happy to assist with custom sizing, profile matching, colour and finish recommendations, and other bespoke requirements when needed.

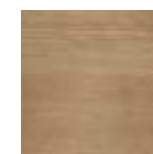

Add an interior coating such as JSC Coda® Lux Wax for protection & easy maintenance.

BATTENS & SCREENS

A STYLISH TIMBER DESIGN FEATURE BOTH INSIDE AND OUT.

Timber battens or screen walls are an opportunity to inject the beautiful and unique features of natural wood elements to any architectural project which can be used to create visual depth, spatial partitioning, and striking design features within commercial or residential spaces.

Popular internal feature due to their natural aesthetic and warm character, eco friendly attributes and their ability to be coated, stained and treated to align with or contrast against the wider interior decor. In exterior applications as they are not part of the weatherproofing system, timber battens and screens can be installed at any angle, variable spacing, and in any style.
