

Red Wolf Sealer is a general-purpose solvent-based sealer used for penetrating deep into dense masonry and stone substrates. It is UV resistant and creates a permanent nano-tech bond that will never peel or blister. It significantly reduces water penetration, efflorescence and water-borne staining without changing the appearance or vapour permeability of the surface.

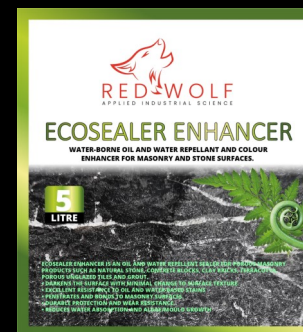

Red Wolf Tile & Grout Sealer is a powerful solvent-based penetrating sealer, specifically formulated to seal ceramic tiles and grout. It is UV resistant and creates a permanent nano-tech bond that will never peel or blister. It significantly reduces water penetration, efflorescence and water-borne staining without changing the appearance or vapour permeability of the surface.

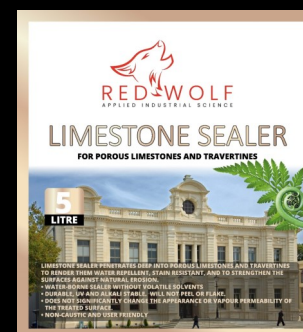

Red Wolf Timberseal penetrates deep into timber surfaces for long-lasting water repellence. It is UV resistant and creates a permanent nano-tech bond that will never peel or blister. It significantly reduces water penetration and silvering on timber surfaces. May also be used on other permeable neutral substrates, such as fabric, paper and polymer renders.

Red Wolf EcoSealer is an environmentally friendly water-based silane/siloxane sealer used for penetrating deep into porous masonry and stone surfaces. It is UV resistant and creates a permanent nano-tech bond that cannot peel or blister. It is made with enhanced beading technology to prevent water penetration, efflorescence and water-borne staining without changing the appearance or vapour permeability of the surface.

Red Wolf EcoSealer Enhancer is an environmentally friendly oil and water repellent sealer used for penetrating deep into porous masonry and stone surfaces. This sealer will enhance the colour of most substrates and can provide a 'wet look' if desired. It will resist most oil and water-borne staining without changing the appearance or vapour permeability of the surface.

Red Wolf Limestone Sealer has been designed specifically to seal and protect porous limestone and travertines. It is stain resistant and will strengthen the surfaces against erosion. It is an environmentally friendly water-borne sealer that will bind loose particles back into the stone surface without changing the appearance or vapour permeability of the substrate.

Red Wolf Stain Resistant EcoSealer is a water and oil repellent sealer used as a stain barrier for porous masonry and stone surfaces. It is UV resistant and creates a permanent nano-tech bond that will never peel or blister. It is an environmentally friendly water-borne sealer that will penetrate deep into the surface without changing the appearance or vapour permeability of the substrate.

Red Wolf sealers are available in

1 Litre

5 Litre

20 Litre

200 Litre and

1000 Litre containers

61 Hillside Road, Wairau Valley, Auckland 0627, New Zealand
