

About us

At Wave Integration, we believe technology should enhance your home—not complicate it.

Based in Auckland, we design, install and support premium smart home solutions throughout New Zealand. From home cinemas and multi-room audio to intelligent lighting, high-performance Wi-Fi, security and complete home automation, every system is carefully tailored to suit your home and lifestyle.

We work closely with homeowners, architects, builders and interior designers to deliver technology that is intuitive, reliable and seamlessly integrated. By combining thoughtful design with trusted products and expert installation, we create systems that are simple to use and built to last.

From the initial consultation through to system design, installation, commissioning and ongoing support, our experienced team is with you every step of the way. We take pride in delivering exceptional workmanship and ensuring every detail is carefully considered.

Our focus is on creating solutions that not only perform flawlessly today but can also evolve with your family's changing needs. The result is technology that blends effortlessly into your home, enhances everyday living and provides years of reliable enjoyment.

Whether you're building, renovating or upgrading your home, our goal is to deliver technology that looks great, performs flawlessly and enhances the way you live.

Why Choose Wave Integration?

- * Tailored smart home solutions
- * Premium, trusted technology partners
- * Expert design, installation and programming
- * Local support and ongoing service
- * Commitment to quality and attention to detail

Beautifully designed. Expertly installed. Effortlessly enjoyed.

Our Process:

Every project begins with understanding how you live, how you entertain and how you want your home to work. No matter the size or stage of your project, we take the time to understand your vision before designing a solution tailored to your lifestyle, budget and future plans.

Our design process is built around professional planning and engineering. We produce comprehensive documentation including floor plans, reflected ceiling plans, wiring diagrams, rack elevations, equipment schedules and programming specifications. This detailed approach ensures everyone involved in your project: from your architect and builder to your electrician and cabinet maker—is working from the same information.

We don't simply select products; we engineer complete systems. Every lighting circuit, speaker, network switch, wireless access point, television, security camera and control interface is carefully considered to ensure every part of your home works seamlessly together. By following recognised industry standards and best practices, we create systems that are reliable, intuitive and easy to maintain for many years to come.

Throughout construction, we work closely with your project team, coordinating with other trades to ensure the technology infrastructure is installed correctly from the very beginning. Attention to detail during this stage reduces delays, eliminates unnecessary rework and helps deliver a cleaner, more reliable installation.

Once installation is complete, every system undergoes an extensive commissioning process. Networks are optimised, audio and video systems calibrated, lighting scenes programmed, security tested and every device checked to ensure it performs exactly as designed. Nothing is left to chance.

Finally, we provide a personalised handover, ensuring you are comfortable using every aspect of your new home. Our relationship doesn't end there, we continue to provide ongoing support, software updates, maintenance and system enhancements, allowing your smart home to evolve as your family's needs change.

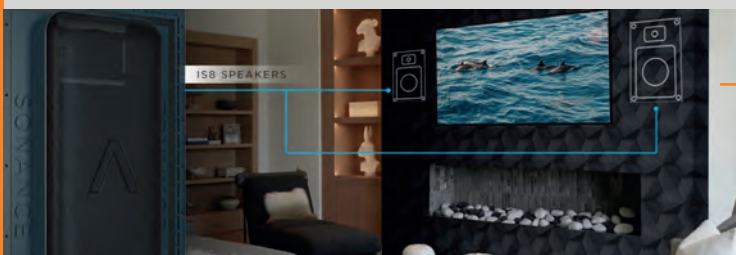

Intelligent Lighting

Create the perfect atmosphere for every moment. Automated lighting enhances comfort, improves energy efficiency and transforms the look and feel of your home with beautifully designed, easy-to-use control.

Home Cinema

Experience incredible picture and immersive sound without leaving home. From dedicated cinemas to media rooms, we design and install entertainment spaces tailored to your home and the way you enjoy movies, sport and gaming.

Multi-Room Audio

Fill your home with music at the touch of a button. Enjoy seamless audio throughout your living spaces, indoors and outdoors, with independent control in every room or perfectly synchronised playback.

Wi-Fi & Networking

Every smart home starts with a reliable network. We design enterprise-grade Wi-Fi and networking solutions that provide fast, secure and dependable performance throughout your entire home, inside and out.

Security & CCTV

Protect your family and property with intelligent security solutions. High-definition cameras, smart access control and real-time notifications provide confidence and peace of mind, wherever you are.

Home Automation

Bring your entire home together with the touch of a button. Control lighting, entertainment, climate, security and more from a single app, touchscreen or voice assistant, whether you're at home or away.
